

## Working party: FO wins the establishment of "meal compensation"

**As from 1<sup>st</sup> October 2019 the staff of the working parties will be able to benefit from the "meal compensation"**, replacing the reimbursement on a real cost basis imposed by the management since February without prior consultation nor taking into account the specificities and constraints of this sector of activity.

**FO** immediately challenged the management on the problems that generated such a new process, so today we can be satisfied to have been heard and with the outcome found, which makes the situation back to a suitable solution for this type of missions.

**FO** will of course be attentive to the good application of this new process.

By the result obtained, **FO demonstrates, once again, that its presence in the field alongside the staff makes it possible to obtain concrete results.**

Thank you to all those who accompanied us on this topic.

**FO** actor in the field, remains attentive to employees.
